## Claims

We claim:

A method for providing assistance to a customer at a web site, comprising the steps of:

receiving a request for a web page from a customer;

sending said web page without a HELP option to said customer;

automatically determining if said customer should be provided assistance; and

if said customer should be provided assistance then sending a HELP option to said customer.

The method of claim 1 wherein said step of automatically determining if said 2. customer needs assistance comprises:

reviewing the saved customer profile; and

if the profile indicates assistance should be provided then determining that said customer should be provided assistance.

The method of claim 1 wherein said step of automatically determining if said 3. customer needs assistance comprises:

measuring the time that said customer spends on said web page; and

if said time exceeds a predetermined time then determining that said customer should be provided assistance.

The method of claim 1 wherein said step of automatically determining if said 4. customer needs assistance comprises:

measuring the time that said customer spends on an area or field within said web page; and

if said time exceeds a predetermined time then determining that said customer should be provided assistance.

5. The method of claim 1 wherein:

said step of automatically determining if said customer needs assistance comprises measuring the time that said customer spends on said web page, and if said time exceeds a predetermined time then determining that said customer should be provided assistance; and

said step of sending said web page comprises sending a heartbeat to a customer with said web page, said heartbeat periodically sending a message to said web site.

6. The method of claim 1 wherein:

said step of automatically determining if said customer needs assistance comprises measuring the time that said customer spends on said web page, and if said time exceeds a predetermined time then determining that said customer should be provided assistance;

said step of sending said web page comprises sending a heartbeat to a customer with said web page, said heartbeat periodically sending a message to said web site; and

said step of measuring the time comprises counting the number of said messages.

7. The method of claim 1 wherein:

said step of automatically determining if said customer needs assistance comprises measuring the time that said customer spends on said web page, and if said time exceeds a predetermined time then determining that said customer should be provided assistance;

said step of sending said web page comprises sending a heartbeat to a customer with said web page, said heartbeat periodically sending a message to said web site;

said step of measuring the time comprises counting the number of said messages; and said step of determining if said time exceeds said predetermined time comprises comparing said number of messages with a predetermined number of messages.

8. The method of claim 1 wherein said step of automatically determining if said customer needs assistance comprises:

reviewing electronic forms with entries from the customer; and

if there are errors of significance in the electronic forms then determining that said customer should be provided assistance.

9. The method of claim 1 wherein said step of automatically determining if said customer needs assistance comprises:

counting the number of times that a customer returns to said web page; and if said number exceeds a predetermined number then determining that said customer should be provided assistance.

10. The method of claim 1 wherein said step of automatically determining if said customer needs assistance comprises:

determining if customer is at a service point; and

if said customer is at a service point, then determining that said customer should be provided assistance.

- 11. The method of claim 1 wherein said step of sending said HELP option to said customer comprises sending a new web page to said customer, said new web page comprising said HELP option.
- 12. The method of claim 1 wherein said step of sending said HELP option to said customer comprises inserting a HELP option in the web page being viewed by the customer.
- 13. The method of claim 1 and, before said step of sending said HELP option to said customer, further comprising the following:

determining whether a customer service representative is available; and

if a said customer service representative is not available then delaying said step of sending said HELP option to said customer until a customer service representative is available.

14. The method of claim 1 and, before said step of sending said HELP option to said customer, further comprising the following:

determining whether a customer service representative is available; and

if a said customer service representative is not available but will be available within a predetermined time then delaying said step of sending said HELP option to said customer until a customer service representative is available.

15. The method of claim 1 and, before said step of sending said HELP option to said customer, further comprising the following:

determining an estimated time before a customer service representative will be available; and

10

if said estimated time exceeds a predetermined time then delaying said step of sending said HELP option to said customer until said estimated time does not exceed said predetermined time.

16. The method of claim 1 and, before said step of sending said HELP option to said customer, further comprising the following:

determining an estimated time before a customer service representative will be available, and if said estimated time exceeds a predetermined time then delaying said step of sending said HELP option to said customer until said estimated time does not exceed said predetermined time; and

wherein said predetermined time is determined based upon measurements of the time between the time that a HELP option is sent to a previous customer and the time that said previous customer responds to said HELP option.

17. The method of claim 1, and further comprising: measuring the time since said HELP option was sent to said customer;

if said time since said HELP option was sent has exceeded a predetermined response time without a response from said customer, then removing the HELP option or sending another web page to said customer, said another web page not having said HELP option.

- 18. The method of claim 17, wherein said predetermined response time is determined based upon measurements of the time between the time that a HELP option is sent to a previous customer and the time that said previous customer responds to said HELP option.
  - 19. The method of claim 1 wherein said HELP option is a HELP button.
  - 20. The method of claim 1 wherein said HELP option is a HELP screen.
  - 21. The method of claim 1 wherein said HELP option is a audio message.
  - 22. The method of claim 1 wherein said HELP option is a video message.

23. A method for providing assistance to a customer at a web site, comprising the steps of:

receiving a request for a web page from a customer;

determining whether a customer service representative is available;

if a said customer service representative is available then sending said web page to said customer with a HELP option on said web page.

24. The method of claim 23 and further comprising:

if a said customer service representative is not available then:

determining an estimated time before a customer service representative will be available; and

if said estimated time is less than a predetermined time then sending said web page to said customer with a HELP option on said web page.

25. The method of claim 23 and further comprising:

if a said customer service representative is not available then determining an estimated time before a customer service representative will be available, and if said estimated time is less than a predetermined time then sending said web page to said customer with a HELP option on said web page;

wherein said predetermined time is determined based upon measurements of the multiple incidences of time between the time that a HELP option is sent to a previous customer and the time that said previous customer responds to said HELP option.

26. The method of claim 23, and further comprising:

measuring the time since said HELP option was sent to said customer;

if said time since said HELP option was sent has exceeded a predetermined response time without a response from said customer, then sending another web page to said customer, said another web page not having said HELP option.

27. The method of claim 23, and further comprising:

measuring the time since said HELP option was sent to said customer, if said time since said HELP option was sent has exceeded a predetermined response time without a

30

10

response from said customer, then sending another web page to said customer, said another web page not having said HELP option;

wherein said predetermined response time is determined based upon measurements of the time between the time that a HELP option is sent to a previous customer and the time that said previous customer responds to said HELP option.

- 28. The method of claim 23 wherein said HELP option is a HELP button.
- 29. The method of claim 23 wherein said HELP option is a HELP screen.
- 30. The method of claim 23 wherein said HELP option is a audio message.
- 31. The method of claim 23 wherein said HELP option is a video message.
- 32. A method for providing assistance to a customer at a web site, comprising the steps of:

receiving a request for a web page from a customer;

determining whether a customer service representative is available;

determining an estimated time before a customer service representative will be available; and

if said estimated time is less than a predetermined time then sending said web page to said customer with a HELP option on said web page

- 33. The method of claim 32 wherein said predetermined time is determined based upon measurements of the time between the time that a HELP option is sent to a previous customer and the time that said previous customer responds to said HELP option.
  - 34. The method of claim 32, and further comprising measuring the time since said HELP option was sent to said customer;

if said time since said HELP option was sent has exceeded a predetermined response time without a response from said customer, then sending another web page to said customer, said another web page not having said HELP option.

10

## The method of claim 32, and further comprising:

measuring the time since said HELP option was sent to said customer, if said time since said HELP option was sent has exceeded a predetermined response time without a response from said customer, then sending another web page to said customer, said another web page not having said HELP option;

wherein said predetermined response time is determined based upon measurements of the time between the time that a HELP option is sent to a previous customer and the time that said previous customer responds to said HELP option.

- 36. The method of claim 32 wherein said HELP option is a HELP button.
- 37. The method of claim 32 wherein said HELP option is a HELP screen.
- 38. The method of claim 32 wherein said HELP option is a audio message.
- 39. The method of claim 32 wherein said RELP option is a video message.
